

ChemLinked Cosmetic Regulatory Database

Quickly access official cosmetic regulatory documents of Asia-Pacific countries

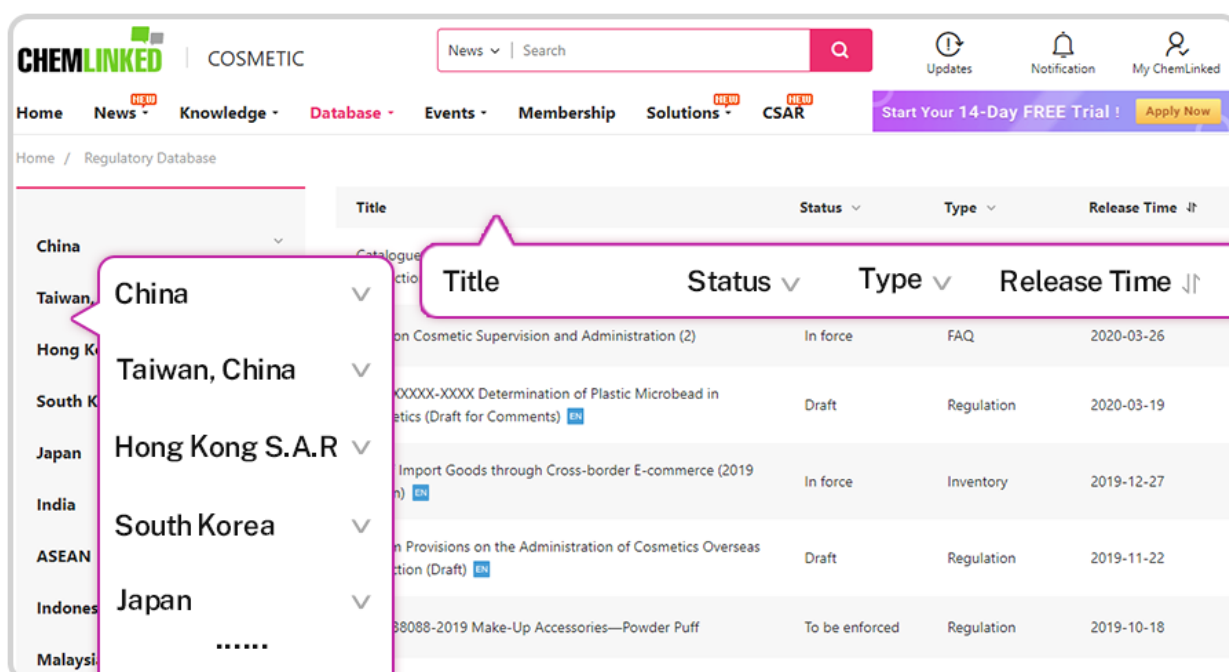

to enable market access for your products.

As regulations change and governing group publish policies in multiple languages and formats, it is hard for an individual or a compliance team to keep up. To address these challenges, we have re-launching and upgrading our database – [ChemLinked Cosmetic Regulatory Database](#).

This structured database is a comprehensive compilation of regulations for cosmetics in over 12 APAC countries and territories. It provides up-to-date details about officially released cosmetic regulations and standards, helping you quickly access accurate regulatory information and navigate compliance challenges.

To help you navigate the changes to our database here are some pointers you might be interested in.

- **1000+ English translation** of a regulation can now be directly access in the database. You may also request a translation if there are currently no available resources. We're able to provide English / Korean / Japanese / Vietnamese and more language translations of regulatory documents.

- **The Details page** is where you can find more specific information about a regulation including: content summary, obligations, the original language documents and when available, their English translations.

The screenshot shows a regulation details page with the following fields and callouts:

- Local Title:** (empty)
- Type:** (empty)
- Status:** Callout: Status
- Competent Authority:** Callout: Competent Authority
- Country/Region:** Callout: Country/Region
- Release Date:** Callout: Release Date
- Implementation Date:** Callout: Implementation Date

The page includes a **Summary** section with the following text:

The Cosmetic Act is the overarching regulation for cosmetics in South Korea. Supporting this act is a set of administrative documents. This act provides measures for the manufacture, importing and sale of cosmetics and cosmetic ingredients and includes detailed requirements for the labeling and advertising of products.

Compared with the previous version, the new act excludes the businesses of dividing solid soap and other specified cosmetics into smaller amounts from business of custom cosmetics.

The page also includes a **Document** section with the following text:

[Original Version] Callout: Original Version
[English Version] Callout: English Version

- **Our 40,000+ Members** spanning different areas have searched regulations and found data with our cosmetic regulatory database. See some of them:
