

GB 33372-2020

Limit of Volatile Organic Compounds Content in Adhesive

胶粘剂挥发性有机化合物限量

Authorities: SAMR, SAC

Release Date: Mar. 04, 2020

Implementation Date : Dec. 01, 2020

National Standard of the People's Republic of China

GB 33372-2020
In place of GB/T 33372-2016

Limit of volatile organic compounds content in adhesive

Date of Issuance: 04-03-2020

Date of Implementation: 01-12-2020

Issued by:

State Administration for Market Regulation of the People's Republic of China
and

Standardization Administration of the People's Republic of China

Foreword

All technical contents in this standard are mandatory.

This standard is drafted in accordance with the rules given in GB/T 1.1-2009.

This standard replaces GB/T 33372-2016 "limit of volatile organic compounds in adhesives". Compared with GB/T 33372-2016, the main technical changes are as follows:

- The scope of application of the standard was modified (see Chapter 1, Chapter 1 of the 2016 edition);
- Terms and definitions are modified (see Chapter 3, chapter 3 of the 2016 edition);
- Classification of adhesives was added (see Chapter 4);
- According to different application fields, the limit of VOC content in adhesive was modified and increased (see Chapter 5, Chapter 4 of the 2016 edition);
- According to different types of adhesives, VOC detection methods of different types of adhesives were modified and added (see Chapter 6 and appendix, Chapter 5 and appendix of the 2016 edition).

This standard was proposed and under the jurisdiction of the Ministry of Industry and Information Technology of the People's Republic of China.

The previous versions of the standards replaced by this standard are as follows:

- GB/T 33372-2016.

Limit of volatile organic compounds content in adhesives

1. Scope

This standard specifies the limit, test methods, inspection rules and package marks of volatile organic compounds (Hereinafter referred to as VOC) content in adhesives under specified conditions.

This standard applies to the limit of volatile organic compounds content in solvent-based, water-based, and bulk adhesives.

This standard does not apply to: :

- Adhesives used as an intermediate or not entering the distribution channels as a production raw material;
- Adhesives used for testing or evaluation in any research and development, quality assurance or analytical laboratory;
- Urea-formaldehyde, phenolic aldehyde or melamine formaldehyde adhesives;
- Special functional surface treatment agent for bonding materials.

2. Normative Reference

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

GB/T2793 Test method for nonvolatile content of adhesives

GB/T 2943 Terms of adhesive

GB/T 6682 Water for analytical laboratory use – Specification and test methods
