National Food Safety Standard

Printing Ink for Food Contact Materials and Articles

1 Scope

This standard applies to printing ink for food contact materials and articles.

2 Terms and Definitions

2.1 Printing ink for food contact materials and articles

It is defined as such ink printed on the food contact materials and articles and came into direct contact with food, or came into indirect contact with food, under which its components may be transferred to food. It also includes varnishes used together with printing inks.

3 Product Classification

According to the circumstance of direct/indirect food contact, printing inks for food contact materials and articles are classified into two categories:

——printing ink for direct food contact: ink printed on the food contact surface of food contact materials and articles, which is expected to come into direct contact with food;

——printing ink for indirect food contact: ink printed on the non-food-contact surface of food contact materials and articles and not expected to come into direct contact with food, under which its components may be transferred to food.

4 Basic Requirements

4.1 Printing inks for food contact materials and articles shall comply with the provisions of GB 4806.1.

4.2 The production and printing process of the printing ink shall comply with the provisions of GB 31603.
