Catalogue of Feed Raw Materials

1. Cereals and products derived thereof

Serial number of raw material	Name of raw material	Description of characteristics	Requirements of mandatory labeling
1.1	Barley and products derived thereof		
1.1.1	Barley	Including <i>Hordeum vulgare</i> L. and <i>Hordeum vulgare</i> var. <i>nudum</i> seed. It can be rumen protected	
1.1.2	Barley middlings	One of by-products from barley obtained through the powder manufacturing technology. It consists of aleurone layer, endosperm and a small amount of fine bran.	Starch Crude protein Crude fibre
1.1.3	Barley protein powder	By-product from barley obtained after starch and bran separation. It consists principally of protein.	Crude protein
1.1.4	Barley flour	Powdery product from barley obtained through powder manufacturing technology. It consists principally of barley flour and contains a small amount of fine wheat bran and embryo.	Starch Crude protein
1.1.5	Barley slurry flour	Product obtained from barley through concentrating and drying the liquid by-products resulting from extracting protein and starch through wet process.	Crude protein
1.1.6	Barley bran	The fragments of the outer skins from barley separated during the milling and powder manufacturing process.	Crude fibre
1.1.7	Barley hull	The hull of barley removed by the dehulling process.	Crude fibre
1.1.8	Barley sugar residue	By-product from the production of starch sugar from barley.	Crude protein Moisture
1.1.9	Barley fibre	Fibre extracted from barley seed, or fibrous products extracted in the process of barley starch manufacture.	Crude fibre

Catalogue of Feed Raw Materials

Serial number of raw material	Name of raw material	Description of characteristics	Requirements of mandatory labeling
1.1.10	Barley fibrous residue [Barley bran]	By-product of barley starch processing. It consists principally of cellulose and contains a small part of endosperm.	Crude fibre
1.1.11	Barley malt	Product from barley after germination.	Crude protein Crude fibre
1.1.12	Barley malt powder	Product from barley malt obtained through drying and milling.	Crude protein Crude fibre
1.1.13	Barley malt rootlets	By-product from malting barley and barley malt cleaning, consisting of rootlets, barley fines, husks and small broken barley malt.	Crude protein Crude fibre
1.1.14	Barley, roasted	Product from barley obtained through moderate roasting process.	Starch Crude protein
1.1.15	Spouting barley bran	Products obtained after drying the by-products of barley production starch and embryo, which was sprayed by the barley soaking liquid.	Crude protein Crude fibre
1.1.16	Barley, puffed	Product from barley obtained through puffing treatment under certain temperature and pressure conditions.	Starch; Starch gelatinization degree
1.1.17	Whole barley flour	Product obtained by milling whole barley grains from which not any skin is removed.	Starch Crude protein
1.1.18	Barley flakes	Product obtained by steaming and rolling dehusked barley. It may contain a small proportion of barley husks. It may be rumen protected.	Starch; Starch gelatinization degree
1.1.19	Barley seedling powder	Product obtained after drying and crushing the seedlings of barley.	Crude protein Crude fiber Moisture
1.2	Paddy and products derived thereof		
1.2.1	Rice	Seeds of <i>Oryza sativa</i> L., herbaceous plant, <i>Gramineae</i> .
