Foreword

The standard supersedes GB 25192-2010 *National Food Safety Standard - Processed Cheese*.

In comparison with GB 25192-2010, the standard has been altered as follows:

- Modify the name of standard;
- Modify the scope of application;
- Modify the terms and definitions;
- Modify the requirements of sensory;
- Delete the physical and chemical indicators;
- Modify the limit of microorganism;
- Add "4 Others".

National Food Safety Standard

Processed Cheese and Cheese Products

1 Scope of Application

The standard applies to processed cheese and cheese products.

2 Terms and Definitions

2.1 Processed cheese

Refers to the product that is mainly made of cheese (proportion over 50%) and prepared by adding other ingredients, food additives (or no food additives) and nutrition enhancers through the processes such as heating, stirring and emulsification (drying).

2.2 Cheese Products

Refers to the product that is mainly made of cheese (proportion within 15%~50%) and prepared by adding other ingredients, food additives (or no food additives) and nutrition enhancers through the processes such as heating, stirring and emulsification (drying).

3 Technical Requirements

3.1 Requirements of Raw Materials

3.1.1 The cheese should comply with the provisions of GB 5420.

3.1.2 Other raw materials should conform to the relevant food standards and provisions.

3.2 Requirements of Sensory

The requirements of sensory should comply with the provisions of Table 1.

Table 1 Sensory Requirements

Item	Requirements	Inspection Method
