

GLP Training Course on the Understanding and Implementation of the OECD Principles of GLP

The GLP Training Course 2014 was held with great success by ChemLinked last year. This summer we have invited again Mr. Hedwig Beernaert, a veteran in OECD GLP with over 20 years expertise to offer another training course on GLP quality systems.

A five-day course will be delivered to attendees to learn/review the requirements of the Good Laboratory Practice (GLP) regulations set forth by the OECD, understand GLP compliance and to be able to recognize non-GLP compliance situations. Responsibilities of sponsors, management, the study director, study personnel, and the quality Assurance Unit (QAU) will be discussed. This course is structured to be intensive. To have a much stronger interaction between the trainer and trainees on one side and between the trainees on the other side, the number of attendees will be limited to **25 persons** and will include plenty of opportunities for questions and discussions.

Certificates will be awarded to the attendees after successful completion of the training course. After having been trained, all trainees are expected to be able to implement good laboratory practices and have a deep knowledge of monitoring the performance in laboratory.

Trainer

Hedwig Beernaert

Belgian GLP expert, consultant, GM of EuroQAM

Mr. Hedwig Beernaert is the quintessential GLP expert, author or coauthor of some 100 peer reviewed publications, Chairman of the EU's mutual joint visit program steering group, organizer and developer of multiple GLP courses and vice president of Belgium's GLP accreditation board are just a taste of the accolades that decorate his outstanding career.

During his 20 year tenure, Mr. Beernaert racked up an impressive list of achievements specifically relating to implementation of OECD principles of GLP, and personally was involved in more than 200 OECD sanctioned inspections. Globally renowned as an expert in the field of OECD GLP, Mr. Beernaert started his own consultancy firm "EuroQAM" in 2009, providing quality and dependable advice and consultancy on all things GLP.
