

Preface

This standard replaces determination of n-hexane extract in GB/T 5009.58-2003 “Method for analysis of hygienic standard of polymethylene resin for food packaging”, GB/T 5009.59-2003 “Method for analysis of hygienic standard of polystyrene resin for food packaging” and GB/T 5009.71-2003 “Method for analysis of hygienic standard of polypropylene resin for food packaging”, and determination of extract in GB/T 5009.99-2003 “Method for analysis of hygienic standard of polycarbonate resin used as food containers and packaging materials” and GB 13114-1991 “Method for analysis of hygienic standard of polyethylene terephthalate resin used as food containers and packaging materials”.

Compared with GB/T 5009.58-2003, GB/T 5009.59-2003, GB/T 5009.71-2003, GB/T 5009.99-2003 and GB 13114-1991, the major changes of this standard are as follows:

- the name of this standard has been revised to “National food safety standard Food contact materials and articles Determination of extract of resin”;
- the scope of this standard has been revised;
- the method for determination has been revised.
