Administrative Measures for Pet Foods

Article 1 These Measures are formulated in accordance with the “Regulations on the Administration of Feeds and Feed Additives” in order to strengthen the administration of pet feeds, ensure the quality safety of pet feed products, and promote the development of pet feed industry.

Article 2 The term “pet feed” as mentioned in these Measures refers to pet products that are processed and manufactured industrially for direct consumption by pets, including pet compound feeds, pet additive premix feeds, and other pet feeds. It is also known as pet foods.

Pet compound feed refers to feeds prepared by mixing a variety of feed raw materials with feed additives according to certain proportions in order to meet the nutritional requirements of pets at different life stages or under specific physiological and pathological conditions, which can be used alone to meet the full nutritional requirements of pets.

The pet additive premix feed refers to the feeds prepared by mixing nutritive feed additives with carriers or diluents according to certain proportions in order to meet pets’ requirements on nutritive feed additives such as amino acids, vitamins, mineral trace elements, and enzyme preparations, *etc.*

Other pet feed refers to feeds prepared by mixing several feed raw materials
